

Determine Dyslexia Probability Index Scores

- Subtests that are MOST affected include:
 - Reading and Spelling Composites:
 - Sight Word Acquisition (Irregular Word Reading & Rapid Irregular Word Reading)
 - Phonics Knowledge (Pseudoword Reading & Rapid Pseudoword Reading)
 - Basic Reading Skills (Irregular Word Reading & Pseudoword Reading)
 - Decoding Efficiency (Rapid Irregular Word Reading & Rapid Pseudoword Reading)
 - Spelling (Irregular Word Spelling & Regular Word Spelling)
 - Reading Fluency (Question Reading Fluency & Oral Reading Efficiency)
 - Reading Comprehension Efficiency (Question Reading Fluency & Silent Reading Efficiency)
 - Linguistic Processing Composites:
 - Phonological Awareness (Blending and Segmentation & Substitution & Deletion)
 - Rapid Automated Naming (Rapid Letter Naming & Rapid Number and Letter Naming)
 - Orthographic Knowledge (Letter and Word Choice & Word Pattern Choice)
 - Auditory Working Memory (Letter Memory & Word Memory)
 - Symbol to Sound Learning (Symbol to Sound Learning)
- Subtests that are LEAST affected include:
 - Cognitive Composites
 - Reasoning (Picture Analogies & Geometric Analogies)
 - Vocabulary (Picture Vocabulary & Listening Vocabulary)
